DALEELAK PORTAL

# DALEELAK

Your Gateway to Government & Judicial Services in Jordan

www.daleelak.jo

# THE PROBLEM & OUR SOLUTION

## The Problem

Citizens in Jordan face confusing, fragmented government and judicial processes — unclear required documents, unknown fees, hard-to-find branch locations, and difficulty selecting the right court. There is no single, reliable guide to navigate these services efficiently.

## Our Solution

Daleelak offers two clear pathways: Government Services and Court Services.

Government Services: select your department and service, receive required documents, nearest branch, estimated fees and processing time.

Court Services: choose court type, city, and branch, then follow a guided case submission process.

Simple user journey: from service selection to complete, actionable guidance in minutes.

One portal. Clear steps. No confusion — designed for every Jordanian citizen.

# CORE PLATFORM CAPABILITIES

## Government Services

*Select a department and service to instantly receive required documents, nearest branch location, estimated fees, and processing time.*

## Court Navigation

*Choose your court type, city, and branch, then follow a step-by-step pathway to submit your case with full clarity.*

## Guided Case Form

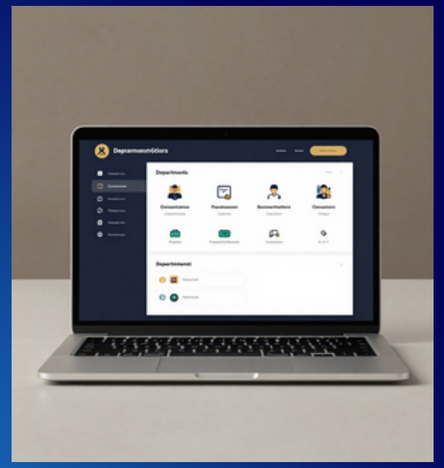

*Enter parties, case details, evidence, and witnesses through a structured guided form designed for ease and completeness.*

## Smart Prioritization

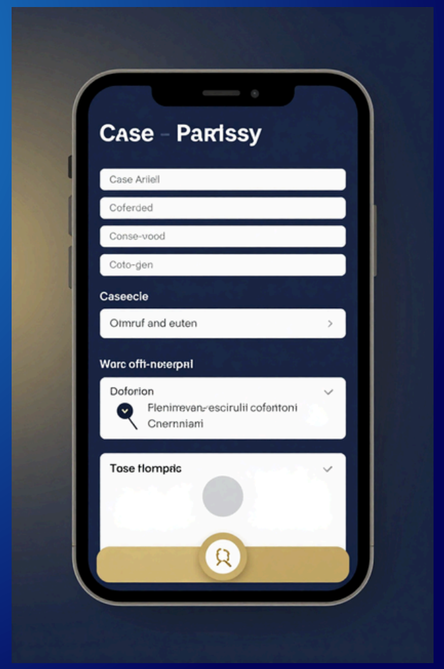

*Prototype rule-based simulation categorizes cases as red (urgent), yellow (moderate), or green (routine) to determine queue ordering and transfer alerts.*

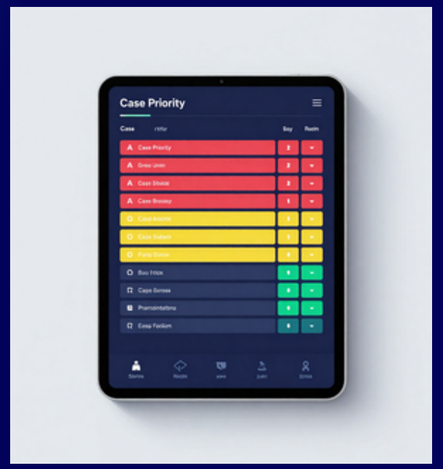

## Dashboards

*Citizens view their case list and track status. Court staff access a priority-sorted case dashboard to manage workload efficiently.*

# What the User Receives

### Required Documents
A clear list tailored to your chosen service

### Nearest Service Branch
Address and location details close to you

### Estimated Fees
Transparent fee range or fixed amount

### Expected Processing Time
Estimated duration to complete your service

> These results are generated using simulated data and do not represent live official government services.

# Government Services Made Simple

**1 Select Department** → **2 Choose Service** → **3 Identify User Status**

- Vehicles
- Civil Status
- Land & Survey
- Other

- Citizen
- Resident

> Note: This prototype uses simulated data and is not connected to live official government services.

# GUIDED CASE FORM

Daleelak walks you through every step of submitting your case — from entering party details to receiving a priority category and queue placement. Follow three simple stages to complete your submission.

## 01

## Parties & Case Details

*Enter plaintiff and defendant information, select the case type and relevant court, and provide a clear description of the dispute to begin your submission.*

## 02

## Evidence & Witnesses

*Upload supporting documents, list witnesses, and review all entered details carefully before proceeding to ensure accuracy and completeness.*

## 03

## Submit & Prioritize

*Submit your case for simulated rule-based prioritization (red, yellow, green), queue ordering, and possible transfer notification. This is a prototype simulation, not real AI.*

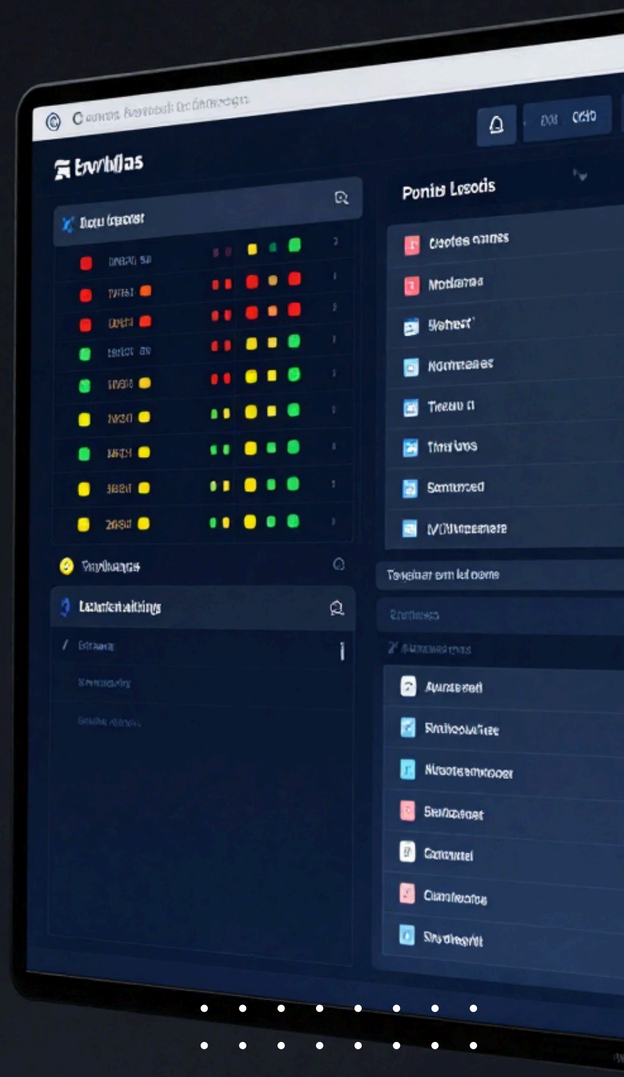

# DASHBOARDS

## Citizen Dashboard

- View all submitted cases
- Track case status updates
- See priority color labels
- Receive transfer notifications
- Access case history & details

## Court Dashboard

- View court-specific case list
- Cases sorted by simulated priority
- Review red, yellow, green categories
- Monitor possible case transfers
- Manage queue ordering efficiently

# CONCLUSION & FUTURE WORK

## Bilingual Access (Arabic & English)

*Future versions will support full Arabic and English interfaces, ensuring all citizens in Jordan can navigate government and judicial services in their preferred language.*

## Real Database Integration

*Plans to connect Daleelak with live government databases to provide real-time document requirements, branch locations, fees, and queue status — replacing current static prototype data.*

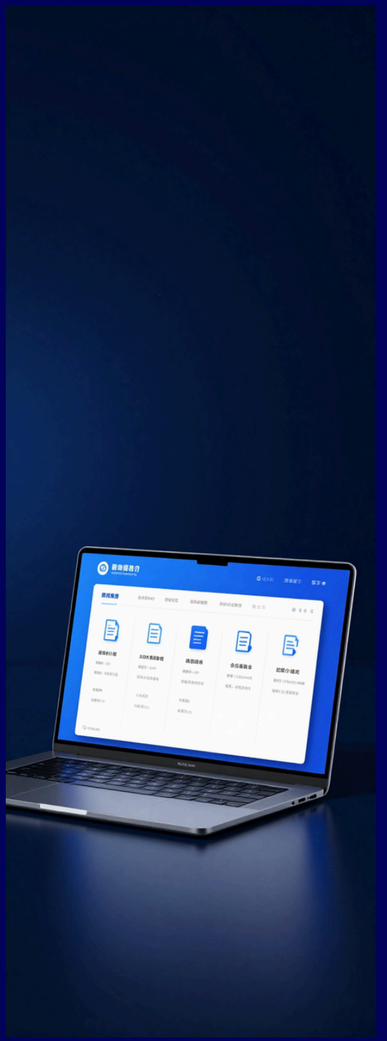

## Official Service Connections

*Future integration with official Jordanian government portals and court management systems to enable authentic service lookups, verified procedures, and direct case submissions.*

## Validated AI — Beyond the Prototype

*Current case prioritization is a rule-based prototype simulation — not real AI. Future versions aim to incorporate validated machine learning models reviewed and approved by judicial authorities.*

DALEELAK

# THANK YOU

Daleelak makes government & judicial services clear, accessible, and easy to navigate

*A Prototype Portal for Jordan's Government & Court Services*

*Clear Guidance · Structured Workflows · Transparent Simulation*

*Future: Bilingual Access · Real Database Integration · Validated AI*
